I am a data-driven sports analytics professional with experience producing research on the college football labor market, the transfer portal, the premier league, and derailment among highly recruited athletes. My background further spans econometrics, statistical modeling, and applied sports analysis, with a strong focus on translating insights into strategic business and marketing implications. I bring rigorous analytical skills, clear communication, and a deep understanding of professional sports markets, fan behavior, and data-informed decision-making.

## Education
